### **三、设备现场布置安装范例 Installation Example of Equipment Field Arrangement**

#### 1、布置方法 Layout method

##### YX-007-SK 录音屏蔽器主机摆放说明

##### YX-007-SK Recording Shielder Host Placement Instructions

场景确认，此种产品适用于中间有桌子的面对面谈话场景，参看下图  
Scene validation, This product is suitable for face-to-face conversation with a table in the middle. See the picture below.

左侧座位为领导，右侧两个（可能一个）为访客。

屏蔽目的是防止右边的访客录制领导的说话声音，只要录制不到领导的说话就可以了，录上录音者自己说话没有任何意义！

The left seat is the leader and the right two (possibly one) are the visitors

The purpose of shielding is to prevent visitors on the right from recording the leader's voice. As long as the leader's voice can not be recorded, recording the speaker's own voice is meaningless!

**注：更多现场布置方式请咨询经销商**

Note:For more on-site layout methods,please consult the distributor

**特别注意：**

Special attention should be paid to:

开机后根据使用场景调整设备的位置和角度固定，设备作用区域不要有障碍物阻挡，主机的摆放原则参考图片及视频

After boot-up, the position and angle of the equipment are fixed according to the usage scenario. There are no obstacles in the equipment working area. The principle of the host placement refers to the pictures and videos.

YX-007-SK 放置完毕，用录音设备测试，并调节功率旋钮，以达到最佳屏蔽效果为宜。

YX-007-SK is placed, tested with recording equipment and adjusted power knob to achieve the best shielding effect.

**特别注意：如果本款录音屏蔽系统对个别录音设备屏蔽效果不理想，建议采用两套或与其他种类产品搭配使用即可解决！**

## 2、应用场合 Applications

本款 YX-007-SK 录音屏蔽器是由天津市英讯科技有限公司自主研发的，高度集成化的高科技安全防护产品。当不法分子采用录音设备（如手机、录音笔、录音机等）对您进行录音时，录音屏蔽器会产生随机性的噪音信号，该信号能够对语音信号产生压制性干扰，是录音设备拾取的只有噪声信息，而无法分辨出语音信息，从而确保语音信息的安全。广泛应用于：领导办公室、保密会议室、军事作战室、商务谈判室等一切防止录音的场所。

This YX-007-SK recording shield independently researched and developed by Tianjin Heroley Technology Ltd, is a high-tech safety protective apparatus with high level of integration. In case of being illegally recorded via recording devices (such as mobile phones, recording pens and recorders and so on), the recording shield will generate random noise signals which can oppressively interfere with speech signals so that only noise information is picked up by recording devices and the speech information cannot be distinguished to make sure of safety of speech information Generally applied: head office, confidential meeting room, military operation room, business negotiation room and any other places which need to be protected from being recorded.

### 3、测试注意事项 Testing and precaution

此产品采用射频信号屏蔽录音设备，因此开启后有稍许声响属于正常，根据年龄对声响的反应有差异，此声响对人体没有任何影响。

This product uses radio frequency signal shielding recording equipment, so a little sound after opening is normal, according to the age of the response to sound is different, this sound has no impact on the human body.

测试时要模拟真实的使用环境，用正常的音量沟通即可，不必故意提高音量，此产品兼顾本身噪音和实际的屏蔽距离采用最佳软件版本，如有特殊需求可以向我们索要特殊版本的软件！

When testing, it is necessary to simulate the real environment and communicate with normal volume without intentionally increasing the volume. This product takes into account its own noise and actual shielding distance and adopts the best software version. If there are special requirements, it can give us the special version of the software we need!

**注意：**桌面型录音屏蔽器的发射端子正对录音设备的时候屏蔽效果最好。

Notes:there will be best effect of shielding when emission terminals of desktop recording shield are directly facing recording devices.
